SECTION 1: READING PASSAGE & COMPREHENSION

Câu 1: (1.0) What is the primary factor contributing to urban heat islands according to the text?

- A. Reduced solar radiation in dense settlements
- B. Natural volcanic activity in suburban perimeters
- C. High concentration of asphalt and concrete structures
- D. Excessive agricultural runoff

Câu 2: (1.0) The author implies that mitigation strategies are predominantly:

- A. Completely ineffective in subtropical zones
- B. Cost-prohibitive without state subsidies
- C. Universally adopted across developing nations
- D. Viable only through retrofitting urban green corridors

Câu 3: (1.0) Which statement aligns with the empirical evidence presented in paragraph 3?

- A. Concrete pavements reflect 95% of infrared energy
- B. Cool roofs are detrimental to winter thermal retention
- C. Vegetative canopies reduce surface temperatures significantly
- D. Microclimates remain unaffected by architectural density

SECTION 2: ACADEMIC WRITING TASK 2

Câu 4: (7.0) Some educational experts argue that artificial intelligence in pedagogical frameworks will render conventional classroom environments obsolete. To what extent do you agree or disagree? Write at least 250 words.
